Notes

Notes for the USB device

You can use an external HDD (USB HDD) in the following two ways (A single HDD cannot handle those two ways simultaneously), and a USB memory for data files.

• **For recorded titles**

Moving titles in the built-in HDD to a USB HDD to save the capacity of the built-in HDD.

• The USB HDD must first be registered on this unit. (⇨ 80)
• The USB HDD over 3 TB is not usable.

• **For data files**

Playing back MP4, JPEG, MP3, etc. (data files) in a USB device with this unit.

• The USB device must be formatted in FAT12, FAT16, FAT32 or NTFS file system.
• The USB device over 2 TB is not usable.

• This unit supports USB 2.0 High Speed.
• Although this unit can use USB 3.0 devices as USB 2.0 devices, in certain cases USB 3.0 devices cannot be used due to differing connector shape, larger current ratings, etc. (Use of USB 2.0 devices is recommended.)
• This unit does not recognise USB HDDs other than those in which the size of one sector is 512-bytes or 4096-bytes. (For details, consult the dealer of your USB HDD.)
• This unit supports USB mass storage device class.
• This unit does not guarantee connection with all USB devices.

Media handling

- Do not touch the recorded surface of the discs or the terminal surface of the SD cards.
- Wipe with a damp cloth and then wipe dry.

DO	*DO NOT*

- Do not attach labels or stickers to discs.

  - Discs with exposed adhesive from removed stickers or labels (rental discs, etc.).
  - Discs that are badly warped or cracked.
  - Irregularly shaped discs, such as heart shapes.
- Do not expose the terminals of the SD card to water, garbage or other strange things.

Unit care

HDD/USB HDD handling care

• The HDD is a high precision recording instrument and is easily susceptible to damage. Therefore, be careful of the following points while the unit is turned on, especially during operation, otherwise the HDD and the recorded content may be damaged:
  - Do not subject the unit to any vibration and shock.
  - Do not remove the AC mains lead from the household mains socket.

• **The HDD is a temporary storage device**
  - It is recommended to save the recorded content on a disc or to keep the original data or CDs that they were copied from.
  - If you notice a problem with the HDD such as repetitive strange sounds, immediately save (backup) all content and request service. If you continue using the HDD with a problem, the unit or the recorded content will be damaged.

• **If the HDD or USB HDD is damaged, the recorded content cannot be recovered.**

Setup precautions

• **Do not place on anything that generates heat like a Set Top Box, etc.**

• **Place in an area where condensation does not occur. Conditions where condensation may occur**
  - When there is an extreme change in temperature (e.g., when subjected to an air conditioner or when cooled air directly impacts the unit).
  - When there is high humidity or a lot of steam in the room.

In the above situation, **without turning the unit on**, let the unit adjust to the room temperature and wait 2–3 hours until condensation is gone.

• **The unit may breakdown if cigarette smoke or bug spray/vapour, etc. gets inside the unit.**

When moving the unit

Before moving the unit, ensure the disc tray is empty.
1 Switch the unit to standby mode. (Wait until "Good-bye" disappears from the display.)
2 Remove the AC mains lead from the household mains socket.
3 Move only after the unit has come to a complete stop (approx. 3 minutes) in order to avoid subjecting to vibration and shock. (Even after the unit is switched to standby mode, the HDD continues operating for a short time.)

Cleaning

• Wipe with a soft, dry cloth.
• Never use alcohol, paint thinner or benzine to clean this unit.
• Before using chemically treated cloth, carefully read the instructions that came with the cloth.
• Use the lens cleaner (not supplied) to clean the unit's lens.

When requesting this unit for repair

The registration of the USB HDD may be cancelled in the process of repairing this unit. You can use the USB HDD again by re-registering, but all recorded content already on the USB HDD will be lost. In such cases, the recorded content (data) cannot be recovered.

Recording modes and approximate recording times

Depending on the content being recorded, the recording time may become shorter than indicated.

■ **DR mode**

Recording Mode	HDD	BD-RE, BD-R	
	(2 TB)	Single Layer (25 GB)	Dual Layer (50 GB)
DR (HD quality)	303 hours	3 hours 30 min.	7 hours 30 min.
