it‘s
a smart
world!

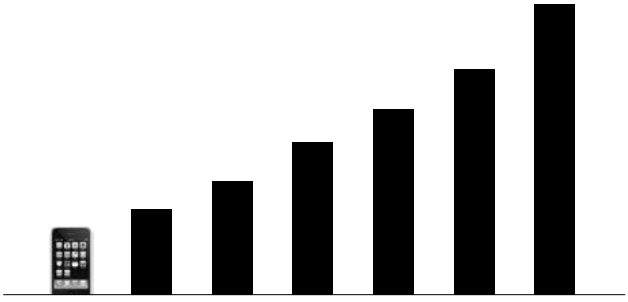
The world is becoming smart.

So is your furniture.

SPECTRAL has made a name for itself for many years with innovative solutions, such as integrated sound systems, hidden cable runs and projector drawers. "SPECTRAL: making technology invisible" is the motto under which we have provided solutions for a tidy living room with entertaining technology.

Now we are facing new challenges: A few years ago, information technology, consumer electronics and telecommunications were still independent areas, but – thanks to the smartphone – they are inseparable today:

People write emails, surf the internet, watch films, take pictures, listen to music, send messages and make phone calls – all using a single device.



Smartphone distribution since the introduction of the iPhone in 2007

However, as smart as the new phones and tablets are, they have one major drawback: While we are content with the limited image size and sound quality of mobile devices when we are on the go, at home we are much more discerning.

We want to enjoy music in the best quality and volume possible, have our pictures run in a slide show and stream films from the Internet or cloud in HD on our televisions from the comfort of our sofas.

SPECTRAL has made it its mission to integrate this digital world in an attractive living environment. Analogue to smartphones and smart TVs, we develop "smart furniture" – elegant home furniture with additional smart features built in.

SHE

»Smart furniture« by SPECTRAL brings
»Home« and »Entertainment« together:

She is delighted with her elegant home
with ample storage space and room for decoration.
He is thrilled with world-class entertainment.

She + He

are like:

Home + Entertainment

She wants	*He wants*

She wants	*He wants*
Easy-to-use technology	**Simply the latest technology**
She wants	*He wants*
Magnificent optics	**Magnificent acoustics**

Our furniture offers both

SPECTRAL
Smart furniture

Smart solutions.

For a smart home

Concealed speakers and cables **for a tidy living room.**

The technology chaos that rules many living rooms leaves us speechless: intrusive speakers, metres of visible cables, five different remote controls and often an iPhone with charger cable lying about. »Smart furniture« by Spectral finally brings order into the living room: Speakers are built into the furniture. Cables are hiding there as well. A host of remotes are replaced by just one. iPhone and iPad can have their own space to charge up and play. And thanks to the infrared link system, you can even control all your devices when the flaps are closed.

Loudspeakers, subwoofers and cables everywhere

Integrated loudspeakers and subwoofers, no cables

Invisible integrated loudspeaker system behind fabric-covered flap

Spectacular sound systems for an impressive home cinema atmosphere.

Our concealed in-furniture sound systems are produced by Canton, Germany's leading loudspeaker manufacturer. The high-performance systems feature integrated subwoofers and digital surround receivers and offer you the choice between impressive virtual surround sound or powerful stereo acoustics.

CANTON® German loudspeaker tradition

HEIMKINO Innovation

HIGHLIGHT HiFi Test TV-VIDEO HIGHLIGHT

A single remote for TV and sound system.

All new Spectral sound systems come equipped with an IR programmable feature. You no longer need additional remote controls or complicated universal remote controls; you can now control your sound system with your regular TV remote control.

Ample storage space
for pretty and useful things.

Thanks to the compact integration of technology, furniture by Spectral offers you lots of additional space for books, vases, plants and other decorations. Anything you want to remain unseen or kept dust-free can be hidden behind a door, flap or drawer.

Wireless content streaming
via iPhone and iPad.

Get comfortable on your couch and enjoy wireless streaming of all your content, including pictures, songs and videos, from your mobile device to the TV and sound system.

A matching media player will provide even more entertainment.

We offer matching side tables for your furniture

ALL YOU NEED IS

Internet

Smartphone or tablet

iPhone, iPad and everything else

TV + media player

e.g. Apple TV

■ SPECTRAL

Smart furniture

One solution. Endless possibilities.

The combination of mobile device, TV, media player and Spectral smart furniture opens the door to all modern entertainment options:

Wireless streaming of all your images, music and videos from your iPhone or iPad to your TV and sound system. You can access YouTube and all other online video and music services via the internet. And an optional Blu-ray player also allows you to play your old CDs/DVDs and new Blu-rays.

TWENTY

EMERSON LAKE & PALMER
WORKS

TWP02

TWENTY
is all in one.

ROOM FOR THE BEAUTIFUL THINGS AND PLENTY OF STORAGE SPACE.
WHATEVER YOU DON'T WANT TO BE SEEN REMAINS HIDDEN.

A bit of art on the shelf, favourite books always in view.
Lots of storage space above, a little to the sides.
And everything floating nicely, with individually arranged wall cabinets.
What you can do, if you have the opportunity to ...

TWENTY

it's a smart world!

TWP06

Room for plates and decoration. Concealed speakers. **No visible cables lying about.**

FOR THOSE WHO PREFER TO HEAR SPEAKERS, RATHER THAN SEE THEM.

With TWENTY, the speakers are invisibly integrated into the furniture. They produce an incomparably rich surround sound without all those cables scattered around .

And what about the amplifiers and subwoofers?

Both are integrated in the sound system.
So that they, too, are out of sight.

THE XTA1 SOUND SYSTEM

Wide, black, strong. Less than 7 cm high, the sensationally flat 2.1 virtual surround system XTA1 scores with its unbelievable sonorous bass. Depth you can hear, not see. Yet, the system can do more than surround mode; it equally stands out in stereo mode. And the option to play music directly from your smartphone via Bluetooth is extremely practical.

TWENTY
is easy.

**TWENTY IS A PURIST, EASY-TO-CONFIGURE MODULAR FURNITURE PROGRAMME.
IT LEAVES OUT EVERYTHING THAT MAKES FURNITURE PLANNING AND LIFE COMPLICATED.**

A grid dimension of 20 cm makes planning home entertainment systems with Twenty child's play. It's like a game of Tetris: the tall, flat and square box modules are simply placed next to each other or stacked on top of each other. Since the elements are always flush with each other, TWENTY can be extended with additional furniture elements at any time.

TWP03

TWENTY
connects.

The model series' elegant »Connect« side tables TWENTY acts as a charging station for your iPhone or iPad, and a control centre in your living room.
At the press of a button, you can stream music, photos, videos or web content to your TV or sound system from the comfort of your sofa.

TWENTY
is colourful.

SOME THINGS HAVE A CERTAIN SHAPE
AND SOME A CERTAIN COLOUR.

She likes it homely; he prefers things
in classic black, white or wood. Just as well TWENTY
comes in a variety of colours that make everyone happy.

TWP05

TWP01

TWENTY
is high-end.

FURNITURE FOR DREAMING AND ENJOYING.

The sound that emanates from a Spectral VRA sound system cannot be described by words. Canton itself describes them as by far the best front surround sound system in the world. Well, for us it is the most beautiful front surround sound system in the world.

WiMP

Spectral recommends WiMP Hi-Fi, the only music streaming service that provides its entire music catalogue in uncompromising sound quality. For more information about WiMP, visit **wimp.de**.

Beauty...

...full

TWP04

Canon
Canon
SAMSUNG

TWP07

TWENTY
is endless.

With TWENTY, the home cinema components are entirely invisible.
That means you can fully focus on furnishing, decorating and living.

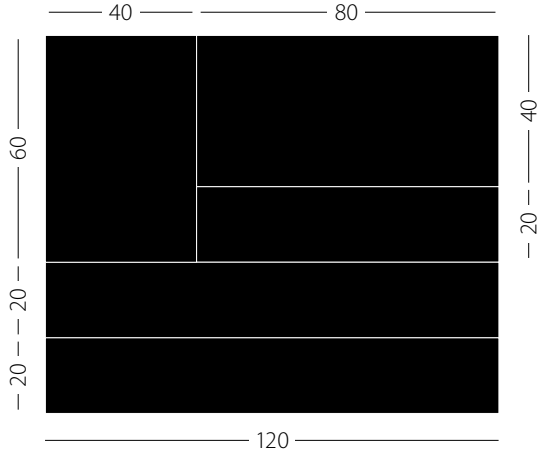
And if you need even more beautiful storage space,
you simply extend TWENTY along the next wall.

TWP06

The smartest way to customised furniture.

The TWENTY concept

TWENTY IS A PURIST, EASY-TO-CONFIGURE MODULAR FURNITURE PROGRAMME WITH VARNISHED AND VENEERED SURFACES. IT LEAVES OUT EVERYTHING THAT MAKES FURNITURE PLANNING AND LIFE COMPLICATED.



SIMPLE PLANNING THANKS TO A GRID DIMENSION OF 20 CM.

A grid dimension of 20 cm makes planning home entertainment systems with TWENTY child's play. It's like a game of Tetris: the tall, flat and square box modules are simply placed next to each other or stacked on top of each other. Since the elements are always flush with each other, TWENTY can be extended with additional furniture elements at any time.

SURFACES AND COLOURS.

TWENTY comes with semi-matte varnished or veneered surfaces. Choose from 26 colours and the three veneers Sand Oak, Indian Walnut and Dark Oak. The fabric front covers for the speakers are available in black, silver and carbon.

UNLIMITED DESIGN OPTIONS.

The element widths vary in size from 20 cm to 160 cm, the element heights from 10 cm to 180 cm. Elements are available in depths of 38 cm and 48 cm. Matching shelf boards with depths of 28 cm and 48 cm are also available. The elements come in a choice of open design, with a flap, door, drawer or fabric cover. The fronts in the TWENTY range are handleless and operated by a touch system. TWENTY is mounted on the wall, on a sledge foot or a flat base.

HIDDEN SOUND.

TWENTY offers four sound integration options. We offer the SCA3, the BRA2 and the VRA2, three tried and trusted high-end sound systems by Spectral. All systems are integrated into the furniture and concealed behind a fabric-covered front. The slim design XTA1 only 7 cm in height was designed especially for TWENTY and is concealed in a slim music board measuring a mere 10 cm. Alternatively, you can choose box elements for soundbars by different manufacturers.

ROTATING TV MOUNT.

Virtually all commercial TVs can be fixed to this rotating universal TV mount. The cables are run in the column hidden from view. The bracket rotates in all directions, enabling you to watch movies from every angle.

It's beyond simple - your specialist retailer will configure your TWENTY in line with your expectations with a 3D planning software.

SCALA

Home is **the most beautiful place.**

AS MUCH AS WE ENJOY TRAVELLING - AT SOME POINT OUR DESIRE TO BE HOME TAKES OVER.

SCALA by SPECTRAL is one reason. With its enormous choice of low boards and wall cabinets, this elegant modular furniture offers tremendous freedom for the design of your very own home. Integrated sound systems and docking option for mobile devices make sure you never get bored at home even after you've decorated.

Integrated sound system
with fabric-covered flap

scratch-resistant glass surface
in over 2,000 colours

Wall cabinets
with glass side panel

SCALA combination with wall-mounted low boards and wall cabinets,
docking station for mobile devices, rotating TV mount

Sophisticated
flap mechanism
with soft closing mechanism

Anodised aluminium handle

Only flying is **more exciting**.

Give your living room a touch of lightness with a levitating SCALA, matching wall cabinets and a SPECTRAL MUSIC BOX for carefree musical enjoyment thanks to the docking station for mobile devices.

2x SCH37, SMB1-iP, SC1650-SL and SC1650-TX in NCS colour

Scala has **many faces.**

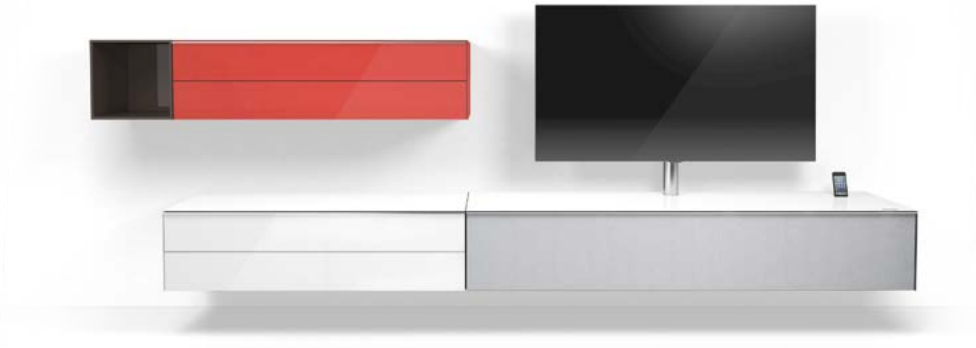
AS A STAND-ALONE LOW BOARD OR IN COMBINATION WITH WALL CABINETS.

SCALA opens the door to countless possibilities for the design of your living room. A choice of over 2,000 glass colours allows you to set additional accents.

Scala SC1651 in selected NCS colour (taupe) with fabric flap in carbon (CF), sound system and docking station for mobile devices

2 x SCH1000, SCH48, SC1651W-TX-iP in NCS colour (taupe)

SCH37, SMB1-iP, SC1100W-SL and SC1650W-TX in NCS colour (taupe)



SCH37, SCH1100 in NCS colour (coral), SC1100W, SC1651W-TX-iP

More than meets the eye.

Scala is now available with a fabric-covered flap. It beautifully hides an optional integrated sound system for an impressive sound experience. What's more, it offers space for devices such as media servers, game consoles or Blu-ray players which won't overheat thanks to the fabric flap in the furniture.

Scala SC1651 in silver with fabric flap in silver,
rotating TV mount, docking station for mobile devices and BRA2 sound system

One Scala
Many sound systems.

Whether you choose a Spectral signature sound system or a soundbar from a different manufacturer, you can unleash the sound from behind SCALA's fabric-covered front.

COCOON

The most beautiful home cinema in town.

SAY GOODBYE TO RANDOM HI-FI COMPONENTS IN YOUR SIGHT –

COCOON, the versatile media furniture by SPECTRAL. In addition to the docking station for mobile devices, COCOON offers plenty of space for integrating a wide range of sound systems. To connect all cables, the magnetically attached glass shelf can simply be removed.

COCOON combination CO1001 as a room divider in snow glass with fabric flap in black, sound system BRA2, rotating TV mount, docking station for iPhone and iPad, wall cabinets in snow glass and choice of NCS colours

Inside handle and mirror

Adjustable height legs in polished stainless steel

Quick and easy cabling thanks to removable, magnetically secured glass shelves

Drawer element with mirrored front and CD/DVD insert

Model series

COCOON

COCOON combination CO1001 as a room divider in snow glass
with fabric flap in black (BF), sound system BRA2,
rotating TV mount and docking station for iPhone and iPad

Open
to everything.

Behind the opaque, fabric-covered front of the technical elements, sound systems can unleash their full potential. The interior can be divided up flexibly to store sound projectors, a subwoofer and centre speaker. Thanks to the opening in the furniture base, you can also use subwoofers with Downfire function inside the furniture.

BRICK

Simplify
your living room.

UNCLUTTER YOUR LIFE WITH BRICK,
THE WORLD'S FIRST TV FURNITURE WITH SOUND IN THE BASE.

The virtual surround sound system is concealed in the unit and offers impressive home cinema entertainment with no intrusive speakers and visible cables in plain sight. Even audio and video equipment disappear in the generous space behind the brilliant and shiny glass front.

BRICK BR2001 in choice of NCS colour with mirrored base (polished stainless steel) and BRICK BR1500 with rotating TV mount

Plug in **and enjoy.**

BRICK STANDS OUT WITH ITS RECESSED BASE THAT CREATES THE ILLUSION OF FLOATING FURNITURE.

Apart from the black standard base, we offer an elegant mirrored base - and as an acoustic highlight, you can choose from a range of sound bases with black fabric-covering to fit your sound systems.

Another awesome treat BRICK has in store is the iPhone and iPad docking station. SPECTRAL docks and associated cabling are concealed within the furniture. The mobile device is simply docked into a recess in the glass surface and stored content like music, pictures and videos are streamed directly to the television or sound system.

Sound that **makes your jaws drop.**

THE BRICK SOUND BASE OFFERS SPACE FOR DIFFERENT SOUND SYSTEMS.

Thanks to the black fabric cover, speakers
are hidden out of sight under the furniture.

Sound bases for **SPECTRAL BRA2** sound system

Sound bases for**Sonos** Playbar

Universal sound base for soundbars by a range of manufacturers

BRICK BR2001 in choice of NCS colour with mirrored base (polished stainless steel)

BRICK BR1501

BRICK BR1502 with rotating TV mount
and SPECTRAL BRA2 sound system

BRICK
at a glance.

More than 2,000 colours, three different widths, various heights and a range of combinations of drawers and flaps – BRICK offers the right solution for almost every requirement.

BRICK doesn't skimp on the extras:
The rotating TV mount and the CD/DVD tray insert for drawers are tried and tested and extremely popular.

The best-seller model
of our best-seller series.

BRICK BR2000 in snow glass with glass side panel,
docking station for iPhone and iPad, outside flaps, inside drawers,

DISC

Stay **sophisticated.**

YOU LOVE CLASSICAL FURNITURE, BUT HAVE DISCOVERED THE JOYS OF STATE-OF-THE-ART HOME CINEMA-TECHNOLOGY?

Puristic DISC by SPECTRAL combines classic and modern design in one piece of furniture: The levitating unit atop a robust glass base offers space for a variety of sound systems and auxiliary equipment. DISC is also available with a docking station for mobile devices.

DISC DS51 in snow glass with fabric flap in silver with SPECTRAL sound system BRA2, docking station for iPhone and iPad and rotating TV mount

Pure
enjoyment on all fronts.

You choose whether you want to use your DISC with or without
integrated sound and then select a fabric or glass front.
The fabric front is available in black, silver and carbon.
The glass front comes in the furniture colour, and is thus also available in over 2,000 colours.

Disc DS06 in NCS colour (dark blue) with rotating TV mount and
docking station for iPhone and iPad

Disc DS07 in NCS colour (coral) with rotating TV mount and docking station for iPhone and iPad

Disc DS51 in NCS colour (grey) with fabric-covered flap in silver (SF), rotating TV mount and docking station for iPhone and iPad

Home
of sweet music.

DISC offers a range of solutions for integrating sound.
The models DISC DS51 and DS81 have been optimised for use with BRA2 and SCA3 sound systems by SPECTRAL.
The model DISC DS01 offers space for a range of soundbar systems by various manufacturers.

DISC DS81 in snow glass with fabric flap in silver with SPECTRAL sound system BRA2, docking station for iPhone and iPad and rotating TV mount

Disc DS01 is the universal solution for a wide range of soundbar systems with subwoofers.
What's more, there is even enough space for 2 devices. The universal adapted included is compatible with soundbars that have a maximum size of (W x H x D): 1300 x 145 x 80 mm.

DISC DS01 in snow glass with fabric flap in silver, docking station for iPhone and iPad, rotating TV mount and Samsung sound system.

Models DISC DS03 and DS04 are the new home of Bose home cinema systems CineMate 1SR, CineMate 130 and Lifestyle 135.

A recess in the upper edge of the furniture provides room for the Bose speaker arrays. Additional space for the associated Acoustimass module can be found behind the fabric-covered flap of the DS04 - for impressive deep base sounds without subwoofers in plain sight.

DISC DS03 in snow glass with flap, for Bose speaker arrays, docking station for iPhone and iPad, rotating TV mount

Disc DS04 in snow glass with fabric flap in silver for Bose speaker arrays and Acoustimass module, docking station for iPhone and iPad, rotating TV mount

AMENO

AMENO – THE HIGHLIGHT BY SPECTRAL

Interior design and top range home entertainment blend into one with AMENO by Spectral. The furniture series can be planned in every detail and captivates with outstanding technical solutions and an exclusive material mix of glass, wood veneer, aluminium and ceramic.

Please see our AMENO catalogue or visit a selected specialist retailer to find out all the option AMENO has to offer.

Model series

CATENA

ANYTHING PLANNED FOR TODAY?

CATENA is the individually tailored home cinema and lounge furniture range by SPECTRAL. With cabinets in various widths, heights and depths. With flaps, doors or drawers. With high-quality sofa upholstery for lounge areas. With a great range of mounting solutions for flat-screen TVs. And with integrated virtual surround sound system for authentic, concert-like sound – without visible cables, speakers, subwoofers or receivers in plain sight.

CATENA is available from authorised CATENA partners.

With the CATENA planning guide, you can design your own CATENA step-by-step. Please visit www.spectral.eu to download the brochure or pick it up from an authorised CATENA partner near you. They can even help you configure your furniture on a computer, using the CATENA 3D planning software.

Original

SOUND SYSTEMS

VIRTUAL SURROUND SOUND WORK?
SOUND COMPLICATED?
NO, SOUNDS FANTASTIC.

The left and speakers, as well as the subwoofers (2.1), are integrated in one loudspeaker unit. With the help of advanced sound processing, your ear perceives a surround effect without the need to install five speakers and a subwoofer (5.1) as with a traditional surround system. With DTS® Tru-Surround-Technology, you no longer need walls or other reflective surfaces.

All new Spectral sound systems come equipped with an IR programmable feature. You no longer need additional remote controls or complicated universal remote controls, you can now control your sound system with your regular TV remote control.

ADVANTAGES

- ✓ No loudspeakers scattered about
- ✓ No visible cables lying about
- ✓ Integrated Bluetooth 4.0 interface for wireless music streaming
- ✓ Integrated subwoofers and amplifier
- ✓ Controlled via your regular TV remote
- ✓ Allows any sound positioning within the room
- ✓ Ultra low heat generation thanks to the digital amplifier
- ✓ Components that match and complement each other perfectly
- ✓ BRA2 and VRA2 also with additional HDMI interface

THE XTA1 SOUND SYSTEM

Wide, black, strong. Less than 7 cm high, the sensationally flat 2.1 virtual surround system XTA1 scores with its unbelievable sonorous bass. Depth you can hear, not see. Yet, the system can do more than surround mode; it equally stands out in stereo mode. And the option to play music directly from your smartphone via Bluetooth is extremely practical.

THE SCA3 sound system

Completely blown away by the sound that the SCA3 produces, we double-checked for safety's sake if there really were no other speakers or subwoofers running. Even in terms of performance, the "little" sound system showed impressive results in our big test room. Great effects, clearly understandable dialogues and a bass you can actually feel, we truly enjoyed how it played "Skyfall".

THE SOUND SYSTEM BRA2

Our best-seller Enormously strong and stable surround sound system volume level that can be adjusted to acoustically difficult spaces, thanks to an advanced signal processor. For those who really want a home entertainment system from a one-box solution in the living room, the BRA2 is the best alternative.

THE SOUND SYSTEM VRA2

Uncompromising stereo and surround sound performance. The sound is captivating lively and harmonious. Bass and base tones work hand in hand to offer a fantastic sound experience. Put simply:
the best front surround system money can buy.

CANTON® German loudspeaker tradition

HEIMKINO Innovation

HIGHLIGHT HiFi Test TV-VIDEO HIGHLIGHT

Quality **you can touch.**

Made in Germany

SOPHISTICATED AND ROBUST

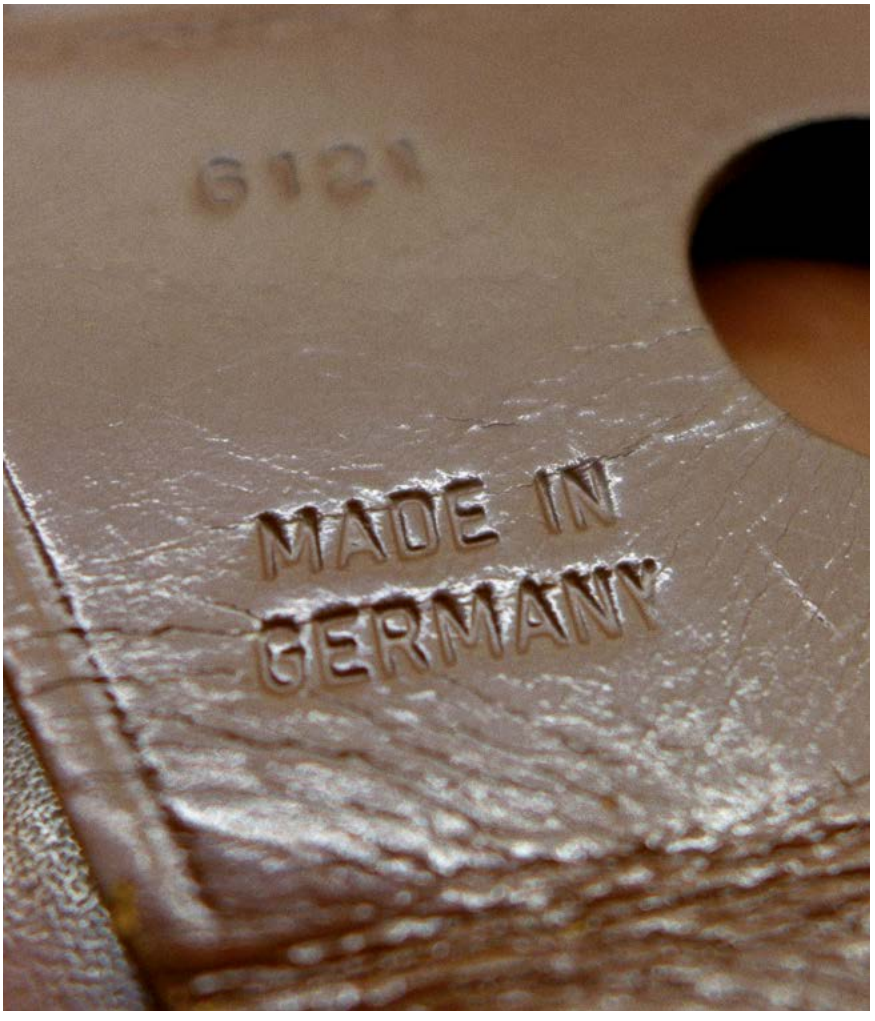
We use only the best materials, fittings and dampers. All connecting elements are made from solid aluminium. The stainless steel used receives a high gloss polish, aluminium is polished and sealed.

SCRATCH-RESISTANT AND DURABLE

The coloured glass surfaces by SPECTRAL are brilliant, scratch-resistant and easy-care.

SPECTRAL SHOWROOMS

Visit our showrooms in Germany and the Netherlands and experience Spectral in its purest form.
Current visiting hours can be found at www.spectral.eu



MADE IN GERMANY

While more and more furniture manufacturers are moving production to the Far East, at SPECTRAL, we're remaining faithful to our roots. With our plant in Pleidelsheim near Stuttgart, we have made a clear commitment to Germany as production location. A decision that benefits our staff as much as our customers. This is only in this way we can maintain our high quality standards in the future and realise your individual requests.

COLOURS

GLASS SURFACES:

You can choose from the three standard colours silver (SV), snow (SNG) and black (BG), as well as over 2,000 NCS colours with the help of a colour fan. You can ordera binding glass colour sample from the SPECTRAL online shop or an authorised dealer. The price of the glass colour sample will then be credited towards your furniture purchase.

SATIN GLASS

Cocoon, Scala, BRICK and the MUSIC BOX
are also available in satin glass.
It gives your furniture a matte, elegant look.

Natural variances:
Glass is produced from natural raw materials and is subject to production-related fluctuations. Colour shades can vary based on the natural colour and the thickness of the glass, as well as the lighting conditions. As a result of the production process, the colour delivered may slightly differ from the sample. Batch-based colour deviations are possible for subsequent deliveries of glass surfaces.

GLASS SURFACE IN OVER 2,000 NCS COLOURS

COLOURS FOR FABRIC FRONTS

The covers of the fabric flaps and sound covers are available in colours:
Black (BF), silver (SF) and carbon (CF)
The sound cover for BRICK is only available in black (BF).
