

NAC 282

Controlled performance.

Product EANs: xxxxxxxxxx

Step up from the NAC 202 and you arrive at the outstanding NAC 282, which includes the NAPSC power supply unit optionally available on its sibling. The NAPSC independently powers the NAC 282's digital and control circuits, leaving its audio circuits to either the power supply of a NAC 155 XS or NAP 200 power amplifier, or to one of our standalone FlatCap XS, HiCap or SuperCap power supplies. The result is even greater transparency and superior musicality plus, of course, all the flexibility you'd expect from one of our preamplifiers.

Key Features

- Support for both DIN and RCA inputs to facilitate connection into a wider range of systems
- Silent microprocessor control that sleeps during listening
- Precision rotary potentiometers with precious metal wipers
- AV bypass mode for simple connection to an existing AV system
- Powered input for use with StageLine or SuperLine phono stages
- Performance upgradable with FlatCap XS, HiCap or SuperCap power supply; can also be powered from the preamp inputs of the NAP 155 XS or NAP 200 power amplifier

NARCOM 5

The NARCOM 5 is a multifunctional remote handset designed specifically for Naim CD players, analogue tuners and preamplifiers (including integrated amplifiers).

Technical Specifications

Inputs	Analogue Input: 4 x DIN, 2 x DIN, RCA Other Inputs: AV input configurable for unity gain
Dimensions	(HxWxD) 87 x 432 x 314 mm/ 3.4 x 13.4 x 12.3 inches
Weight	7.0 kg 14.4 lbs
Analogue Audio Outputs	Audio Outputs: 2 x variable (DIN), 3 x fixed (DIN) Line Outputs Fixed (level): 75mV, 600Ω Line Outputs Variable (level): 775mV Other Outputs: <50Ω Load Impedance: 10kΩ (min.) Power Outputs: Naim phono amplifier
Power Supply Options	NAP 155 XS, NAP 200, FlatCap XS, HiCap, SuperCap
Supplied With	NARCOM 5

Upgrade Options:

- SuperCap DR*
*2 x SNAIC interconnects required
- HiCap DR x 2
- FlatCap XS

Accessories:

- SuperLumina*
*Interconnect or speaker leads
- Hi-Line
