

ARYA ORGANIC

Stunning Audio Value

 **Stealth Magnets Design**

 **Nanometer Thickness Diaphragm**

Nanometer Thickness Diaphragm

 **Nanometer Thickness Diaphragm**

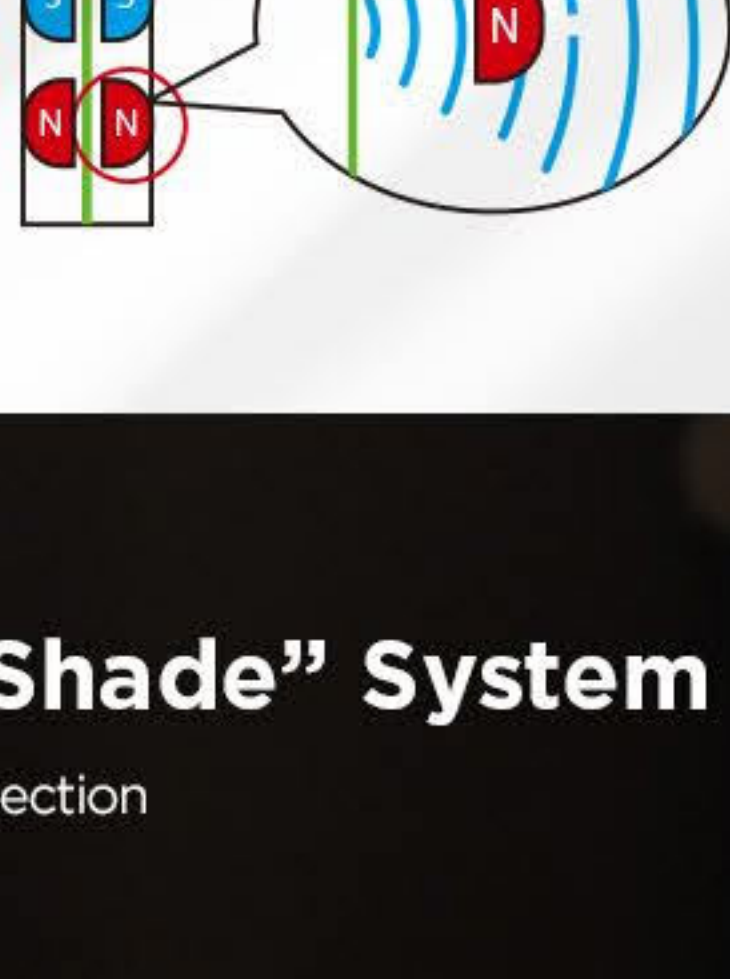

A breakthrough core technology developed by HIFIMAN and first of its kind in headphone application. Working with this advanced material is extremely challenging yet the successful incorporation of this film as the HE1000se's planar driver is the cornerstone of its remarkable sound.

Acoustically Invisible Stealth Magnet

Unlike the sound waves created by a conventional magnet, the special shape of Stealth Magnets enables the waves to pass through the magnets without generating interference.

HIFIMAN's advanced magnet design is acoustically transparent, dramatically reducing wave diffraction turbulence that degrades the integrity of the sound waves. The reduced distortion yields pure sonic output that is accurate and full-range.

Patented "Window Shade" System

Created to meet the need for driver protection and an optimized open-back design

Craftsmanship

The metal structure is created via CNC milling and hand polishing. To meet the critical standard set out by HIFIMAN, the surface finishing is handled and refined by meticulous craftsmen.

The Headband

Ergonomic and comfortable headband design for most people, with greater reliability and durability

Asymmetrical Earcups

Follows the natural shape of the human ear.

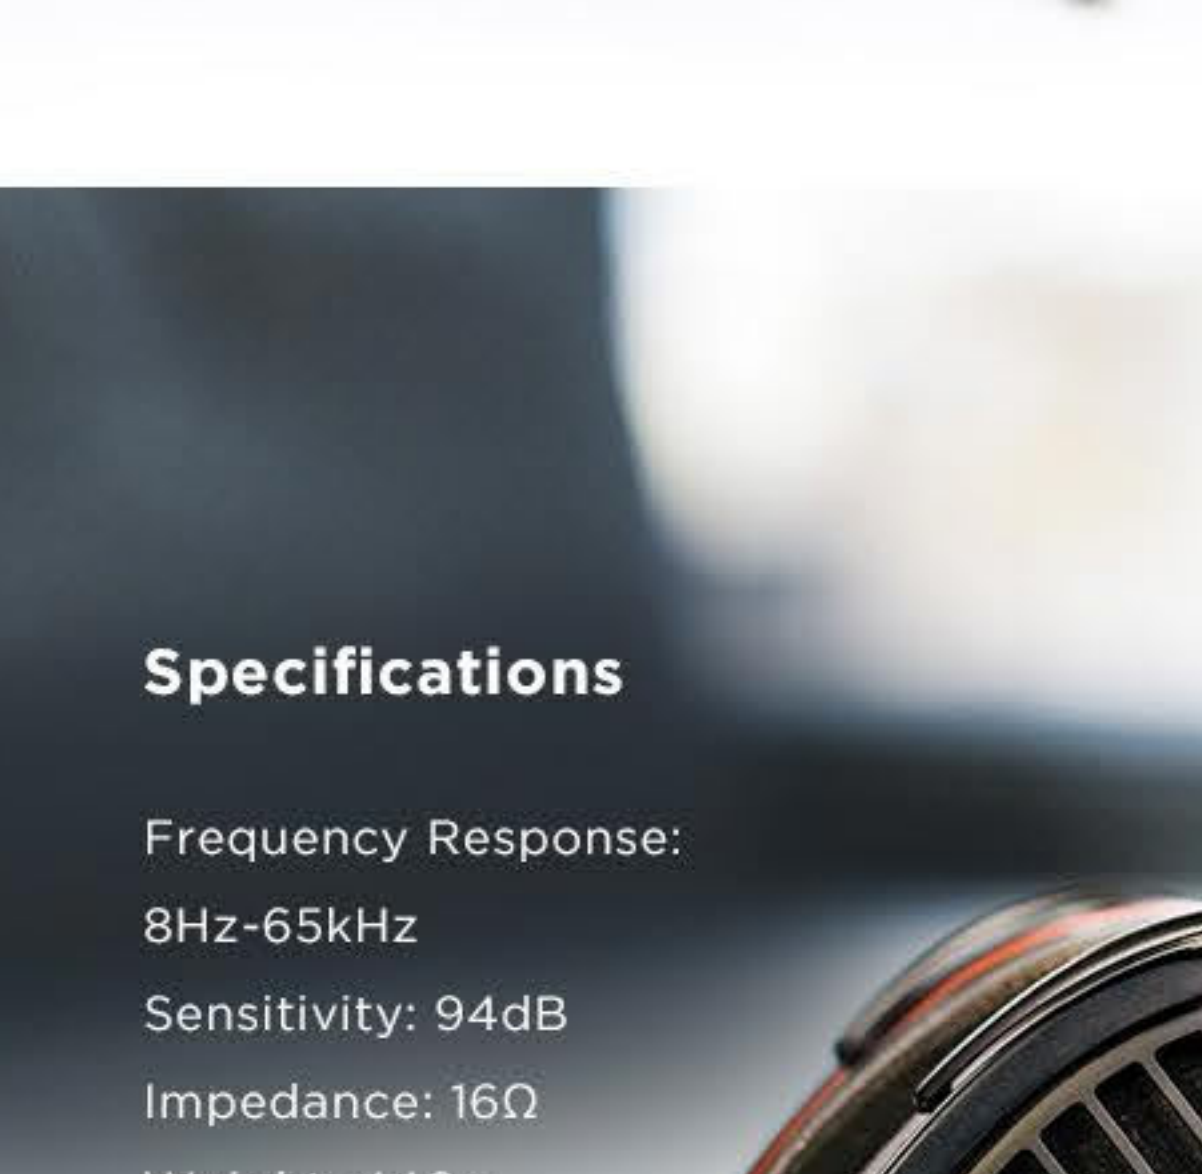

Sturdy 3.5mm User-replaceable Connector Design

Allows easy cable swapping, giving both maximum durability and enhanced customizability.

Cables

The Arya keeps things simple with a single Crystalline Copper cable. Featuring a 6.35mm plug and a jet black woven exterior finish it's the perfect complement to the sound and sight of the Arya.

Specifications

Frequency Response:

8Hz-65kHz

Sensitivity: 94dB

Impedance: 16Ω

Weight: 440g
